

Build It Now, Governor Schwarzenegger.

AB 772 and **AB 1199** are building blocks toward insuring the health of all kids in California. Will Governor Schwarzenegger adopt this critical legislation?

- These two bills will move California toward the **goal of insuring the health care of every child in California.**
- **AB 772 begins with the right first step**—establishing an expert panel to develop recommendations on how to make our existing children's health programs more accessible and cost-effective.
- **AB 1199 creates the California Healthy Kids Fund** to support kid's health coverage through both public and private contributions.
- This legislation creates a **step-by-step approach to build our children's health programs** gradually over the next three years.

It's the right thing. It can be done. Sign the bills today.

Governor Schwarzenegger has until Oct. 9 to approve these bills. **Call, email or fax the Governor's office to ask for his signature on AB 772 and AB 1199.**
