

Make Calls and Spread the Word

On October 20, 2009, national groups including Community Catalyst, SEIU, AFSCME, Organizing for America, HCAN, Families USA, and others are working together to place 100,000 calls in support of health reform into Members of Congress. In an effort called *Time to Deliver*, supporters of health reform will come together to show our strength in numbers.

We are encouraging you and all of our state partners and their networks to commit to three phone calls on October 20: one to your Representative and one to each of your Senators. Our partners are welcome to use PICO National Network's call-in number 866-279-5474. This number will allow you to connect to all three offices with only one phone call.

In addition, we ask you to encourage your networks, friends and neighbors to get involved. There are many ways to spread the word about this important effort:

Alerts

Spread the word about this day far and wide. Send an e-alert to your partners and networks and ask them to do the same.

Twitter

Using the hash tag #timetodeliver, get the word out on Twitter.

Facebook

Ask people to donate their Facebook status for the day on the 20th using "made 3 of 100,000 calls to Congress today to ask them to deliver on health reform."

Share Your Ideas with Other Advocates Across the Country

Send your creative efforts to raise awareness and get people involved with Community Catalyst so we can continue to update and share information with our partners. Send your ideas to jcollier@communitycatalyst.org.

Thank you for spreading the word! The participation of people across the country will tip the balance in support of health care reform. The more attention we bring to this day, the more people who make calls, the more support we can demonstrate in favor of reform in Washington DC. Every call will make a difference.
